Natural marble has some crack effects. The cracks give the tiles the look and feel of authentic marble. A unique glaze is used on top of the design. It is then made to react with a special ink that creates an engraving effect called Crackling.

Introducing Unique Highlighters with special finishes

DECOR MATT

The tiles have a unique dual effect, which enhances the look and feel of the design. When seen from an angle, the dual effect is clearly visible. Some areas appear rough and others look shiny and smooth. These differences can also be touched and felt. Decor Matt tiles are the first GVTs that have this dual effect, achieved by pouring a special imported ink onto desired areas. Eg. Reims Beige

DECOR REACTIVE

An unmatched engraving effect is created on the tiles by using an imported ink and a special glaze. When poured on some areas of the design, the ink reacts with the special glaze and creates this 3D engraving effect, which is visible and can be felt by hand too. Such an effect is usually seen in third fired tiles, but Kajaria has achieved this by employing state-of-the-art technology. Eg. Madison Beige

DECOR SPARKLE

The sparkling effect on the tiles is one of Kajaria's most unique innovations. These tiles shimmer like diamonds and look beautiful when seen from different angles. This effect is achieved by combining two raw materials – a sparkling glaze and an exclusive imported ink. The ink is applied above the sparkling glaze on some areas to make them shinier than others. Eg. Fossil Marfil
